TECHNICAL SKILLS

Programming & Command Languages:

- **Proficient in:** Java, Python, HTML, CSS, C#, PowerShell, MySQL, Bash (Unix shell)
- **Experience with:** x86 Assembly, C++, C, JavaScript, Haskell

Software & Tools: PostgreSQL, WireShark, FreshService, SCCM, Active Directory, PDQ, Group Policy, Microsoft365 Suite, React, JUnit

Operating Systems: Linux, Mac OS, Windows, Raspberry Pi OS

EDUCATION

B.S., Computer Science

May 2026

Colorado State University, Fort Collins, CO

3.9 GPA

Relevant coursework: Systems Security, Database System Concepts, Operating Systems, Machine Learning, Software Testing, Computer Architecture & Assembly Language, Software Engineering, Digital Circuit Logic, Calculus

PROFESSIONAL EXPERIENCE

Content Security Intern, Netflix:

June 2026 – Present

- Industry-standard identification of technical risks within the creative ecosystem, implementation of cybersecurity protections across all production phases.
- Collaboration across content operations to secure operational workflows and intellectual property (IP) protection.

Undergraduate Cybersecurity Researcher, Colorado State University:

January 2026 – May 2026

- Analyzed trade-offs between traditional Access Control and Information Flow Control (IFC), evaluating IFC's ability to provide end-to-end mathematical guarantees for data throughout program lifecycles.
- Conducted a Programming Language (PL) literature review to assess how language traits can impact the enforcement of security properties.
- Synthesized current IFC research to identify technical and usability barriers, identifying potential challenges to industry adoption.

Desktop Support Technician, Colorado State Libraries:

June 2024 – May 2026

- Optimized hardware lifecycle and inventory databases for 500+ workstations, managing asset tracking and decommissioning of non-compliant hardware.
- Maintained system standards for 180+ devices using SCCM and custom imaging, supporting a high-traffic environment of 225+ daily student users.
- Led campus-wide cybersecurity initiatives by transitioning systems to Windows 11, elevating departmental compliance from 50% to 99%.
- Strengthened security posture through an overhaul of 60 loaner laptops and 80 lab systems, implementing critical patches to meet university compliance goals.
- Mentored a student IT team and managed 51 inter-semester projects to ensure hardware readiness for university faculty and staff.
- Mitigated operational risk by updating OS imaging profiles, successfully eliminating 16+ hours of recurring corrective maintenance per deployment.

ORGANIZATIONS + VOLUNTEER WORK

Association For Computing Machinery - Women (ACM-W)

January 2025 – May 2026

Marketing Chair, Digital Strategy and Web Development

Colorado State University ColorStack

May 2025 – May 2026

Founding Officer and Communications Lead
